50 PATTERNS TO CROCHET KEYCHAINS

Foreword

Hello!

Thank you for purchasing my ebook!

I hope you like it and enjoy crocheting my patterns. It has been a great experience for me that has helped me to prove to myself that everything can become into a soft amigurumi.

I like small amigurumis very much, they are easy, quick to crochet, and an original gift suitable for everyone. To me, personally, designing them helps me to disconnect... and as I say, you can do anything, since its small size doesn't suppose an excessive loss of detail.

This time you will find 50 patterns to crochet key chains, pendants, or small details to decorate or give, all designed from the point of view Kawaii or Cute, that is, lovely, tender and endearing.

They are amigurumis of all kinds, so that they adapt to your tastes and "crochet skills".

As you can see, I have tried to deal with diverse topics: the most popular animals, means of transport, objects, hobbies, food, symbols ... but all of them following my basic principle of not using hard elements in their elaboration (the rings do not count, that actually they are an external element).

The patterns are very easy to follow and you will not have problems, even with the most elaborate ones, but if that were the case, I will be happy to help you so that everything goes to your liking.

I encourage you to experiment with the designs and give them your own personal touch. I will love to see the result.

3. Turn and crochet 24 sc (12 over the chains and another 12 over the sc that you already had) (24).
4. Change to green yarn, make a separation chain, turn and crochet in back loops only 12 sc and 17 chains.
5. Turn and crochet 28 sc (16 over the chains and another 12 over the sc that you already had) (28).

11. Turn and crochet 40 sc (28 over the chains and another 12 over the sc that you already had) (40).

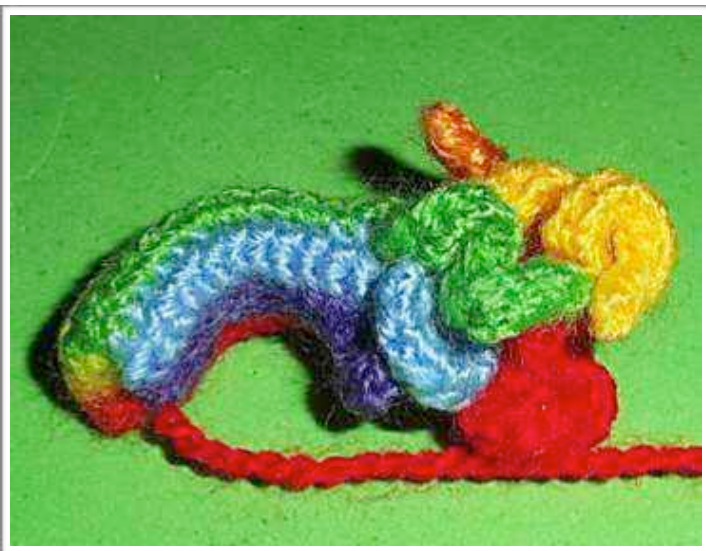

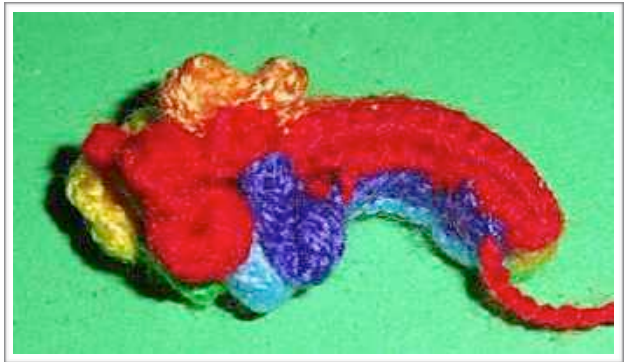

12. We are going to close our rainbow and in the same time create a relief effect in the colors. In order to do that, continue crocheting with red yarn, make a separation chain, turn and make 12 slip stitches joining the sc with the free loops of row 10. In this way, close the red color in the main part of our rainbow, the one that has the same length of 12 sc in all colors. We have left to join the part that remains loose. To do this, also join with slip stitches the stitches of row 11 with the chains of row 10. Fasten off.

Repeat the same method with the rest of the colors, joining with slip stitches the free chains with the higher stitches.

The last color, the one with violet yarn, will not have free chains, so you must join the last row with the higher st.

Once the colors are completed, finish the closure by sewing the red stripe with the violet one and twist the colored tips so they are wavy.

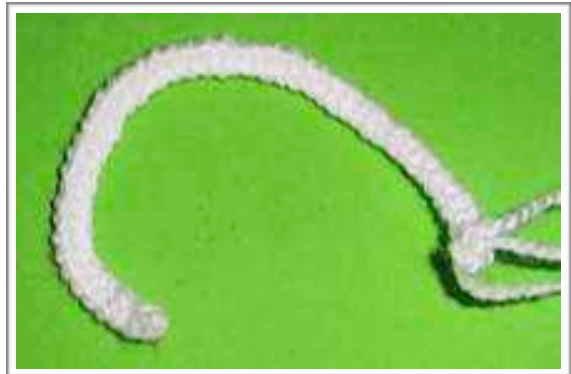

CLOUD:

With white yarn

1. Crochet 51 chains and 50 sc over them.

ASSEMBLY:

Hard wings:

Sew them over the body, taking into account for its placement which one is right and which one is left. Do this from the neck, where you will place the widest and most straight end of the wings, until the end of the body, where you will form an inverted V to join the two wings.

You must join these 2 pieces in such a way that this union is on the middle of the body.

Sew the wings by the sides to the body, but you must also sew to this one the central join. Our purpose is to fill both pieces before they are completely sewn, so that they remain bulky, but leaving the central part sunk because is sewn to the body and can not be filled.

Eyes:

Sew them attached to the initial magic ring, with the pupils placed in the central part.

Antennas:

Together, between the eyes, leaving 1 sc of separation from the highest part of these, that is, on rows 5 and 6 of the head.

Legs

Sew 3 on each side, attached to the hard wings and on each one of their salients.
